

For those familiar with the [Stewart Filmscreen](#) name, the release of their new, competitively-priced line called CIMA comes as a welcome addition. The emmy award-winning company has been the premiere filmscreen in both the commercial and residential world for decades. And that luxury custom-build quality & performance has always come at a luxury price. The CIMA line now opens up the world of Stewart to many more home owners and businesses.

[Cinemafect](#) is an authorized representative of the full Stewart Filmscreen product family, including the CIMA line. Read more about what CIMA is about. Afterward, call us at 877-426-9511 to speak to one of our designers to learn how we can make a Stewart Filmscreen part of your home or place of business.

[CIMA™ by Stewart Filmscreen](#) is now available in Fixed Frame, Above Ceiling, and Below Ceiling framing systems. CIMA offers standard configurations and sizes for projects that are less need specific but still demand quality, durability and performance. Designed and manufactured in the USA by Stewart's award winning team, CIMA offers the exceptional brand quality that Stewart is known for to a broader audience seeking 2-piece projection installations.

"Our team set out to create these high-quality screen solutions for a broad range of basic applications, and the new CIMA line was born," said Grant Stewart, President, Stewart Filmscreen. "The CIMA line maintains the exceptional screen performance that generations have come to expect from the Stewart Filmscreen brand, with unsurpassed screen uniformity and product fit and finish. Standard sizing with finite options allow for manufacturing efficiencies, meaning this product can be ordered and shipped in a matter of days. Now we can address the needs of a much broader range of applications, providing our dealers with expanded opportunities for Stewart product."

The breakthrough design of CIMA™ by Stewart Filmscreen provides unprecedented versatility to integrators who have long enjoyed the high quality and fine-tuned performance of the Stewart Filmscreen brand. With CIMA, Stewart provides screen solutions that have been designed to deliver exceptional performance under a wide range of viewing conditions and at a competitive price. This allows more end customers including burgeoning home theater enthusiasts to experience the quality and performance of a Stewart. The line offers basic screen configurations in both white and gray screen material depending on the environment. The NEVE™ white screen material is ideally suited for applications where lighting control is available, while the TIBURON™ gray screen material is optimized for applications with less lighting control.

CIMA™ by Stewart Filmscreen is available in fixed frame wallscreen, above ceiling electricscreen, and below ceiling electricscreen mounting options for maximum versatility and ease of install. Electric roller screens come with optional IMC low voltage control for interconnectivity to a variety of home automation systems. CIMA screens make installation a very straightforward process and the available options are intended to suit most any standard commercial or residential purpose.
